

Satellite Earth Station in Kabul

Project Description:

The Satellite Earth Station is installed in Mahtab Qala, Kabul. It consists of 8 (meters) dish and acts as an international Gateway for international voice, data and TV services.

- The implementation of this project provides high capacity international Gateway.
- It also provides telephone, television programs, data communication and internet services.
- The establishment of the earth station enabled the Ministry of Communication and Information Technology to offer space segment for rent to mobile and internet service providers
- This project also enabled the government to strengthen its communication with the rest of the world which caused improvement in security, economical and cultural sectors

The project was completed on 31st October 2005.
